HOW IS YOUR HEART TODAY?

A message from the Principal

There is a book titled, *Fearfully and Wonderfully Made*, by Philip Yancey & Paul Brand. This is what I've read. A hummingbird heart weighs a fraction of an ounce, that's less than 28 grams and beats over eight hundred times a minute; a blue whale's heart weighs half a ton and beats only ten times per minute, and can be heard three kilometres away. A human heart beats 65 – 70 times a minute, that's around 100,000 times a day without stopping. Statistically, that same heart keeps beating for 70 years of our lives.

The Bible speaks about the human heart, both literally and metaphorically. Both can lose their strength and are prone to failure but we know that ultimately our strength cannot come from ourselves, it comes from outside of us. God is our ultimate and eternal strength. He is our Creator and He knows no limitations. When we face hard situations and difficult days, we must turn to God, who is and always will be the true strength that our hearts need. We can fully trust Him, every day, in everything.

"My flesh and my heart may fail, but God is the strength of my heart and my portion forever" Psalm 73:26.
